

The Right Stuff Scale, Version #3

According to the "Right Stuff Scale, Version #3", which was also recently developed by the senior author for inclusion here, the respondent(s) is (are) asked to "kindly indicate if s/he/they think that s/he/they have the 'right stuff', 'wrong stuff', or if s/he/they is (are) somewhere in-between. In total, there are fifteen descriptors, with one side composed of "right stuff" items, and the opposite side composed of items representing "wrong stuff" descriptors, e.g., "Always Patient" to "Never Patient." One's score is the total number of points accumulated, across descriptors, which range from as low as fifteen (15) points to as many as one seventy-five (75) points, with the higher scores representing higher marks in terms of the respondent's "right stuff" score. (See Table 3 to peruse the "Right Stuff Scale Version #3).
